

Thomas Armstrong (Construction) Limited

CLIENT: West Cumbria Development Agency

PROJECT: West Cumbria House Lillyhall, Workington

COMPLETION: March 2008

CONTRACT: JCT 98 + Contractors Design

PROJECT DESCRIPTION:

West Cumbria House consists of twenty three individual office units within one building which have the use of common facilities including reception, meeting rooms, lift, and general areas. The project involved the design and construction of both a two and three storey office building with a single storey section encompassing the main entrance and meeting rooms.

The building structure consists of a steel frame with cast in-situ concrete floors. Walls are from brick cavity wall construction and insulated composite cladding which have also been utilised for the pitched roof covering.

External works consist of a 250 capacity car park, service areas and both hard and soft landscaping.
