Classic Stormproof Timber Window Frame

We can provide high performance stormproof windows to any design combination, manufactured to Secure by Design standards, single or double glazed.

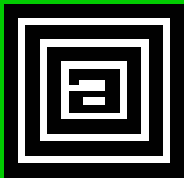

Hardwood or softwood, square, oval, arched, bowed, traditional sliding sash windows to meet with all conservation requirements. Also double glazed and draught proofed.

Tilt and Turn/Inwardly Opening Timber Window Frames

We offer a European style tilt and turn/inwardly opening window frame available in hardwood or softwood with a painted or stained finish. These frames incorporate high security locks. Inwardly opening windows are ideal for high floor levels as they can be cleaned by opening inwards.

Windows

Sliding Sash Window Frame with Traditional Weights

We offer a traditional sliding sash window frame available in hardwood or softwood with a painted or stained finish. The fully glazed, finished window is supplied complete with hardware including sash cords, lead weights, brass pulleys and security fasteners.

Our sash window frame design includes unique gaskets and seals. Traditional style beading is fitted internally and our design incorporates shaped sash horns for the traditional period look.

Material

All windows are manufactured using sustainable timbers from managed forests, both in softwood and hardwood.

Treatment/Finishes

Main sections and components are pre impregnated with double vacuum treatment and prime or base stained. A range of finishing options are available.

Ironmongery

Is fitted to a Secure by Design standard and can be tailored to fit individual specifications.

Glazing

As well as the standard double glazed units that are most commonly available in today's market, we also offer various options of single glazing which are highly desirable in conservation areas. All specifications are in strict compliance with current building regulations
