

Thomas Armstrong (Construction) Limited

CLIENT: Trinity Enterprises

PROJECT: Extension to Barrow-in-Furness Travelodge

COMPLETION: December 2007 **CONTRACT:** JCT 98 + Contractors Design

PROJECT DESCRIPTION:

This project involved the building of a twenty bedroom extension onto an existing Travelodge which had previously been constructed by Thomas Armstrong.

The two storey extension was formed to the existing gable end and is constructed from timber frame as existing. External walls are clad with facing brick and the roof covering formed with concrete tiles.

M&E installation is a continuation to the existing with the addition of sustainable energy technology by incorporating 'air heat' pumps. External works included hard and soft landscaping along with forming an overspill car park.
