

# Thomas Armstrong (Construction) Limited

**CLIENT:** British Nuclear Fuels plc

**PROJECT:** BTC LA Duct and Pipework, Sellafield

**VALUE:** £2.1 million

**COMPLETION:** May 2000

**CONTRACT:** GC Works 1

**DURATION:** 63 weeks

## PROJECT DESCRIPTION:

This was a Civil Engineering contract to construct a low active duct in co-axial pipework placed in an insitu-reinforced concrete box, leading from the BTC which was also under construction, to the separation area, over a length of approximately 800 linear metres, where it discharges into a chamber constructed by others. Also, the diversion of a 675 mm diameter concrete surface water drain.

All Works were carried out under high security measures
