

Thomas Armstrong (Construction) Limited

CLIENT: Home Group Northwest - Partnering

PROJECT: 8 No. Bungalows, Egremont, Cumbria

COMPLETION: April 2009

CONTRACT: JCT 98 + Contractors Design

PROJECT DESCRIPTION:

Bungalows were located on site having previously experienced collapse due to old mine workings which had since been backfilled and capped off.

The design consisted of semi-detached bungalows with gardens and access road leading to a dedicated parking area.

Construction consisted of both piled and raft foundations, facing brick externally and block walls internally. Roof is formed with fabricated trusses and concrete tile covering. Internal finishes are of standard requirements providing a 'general needs' type of provision. External areas are fully complete with turfed gardens, fences, paths, sheds and drying facilities for clothing.
