

Thomas Armstrong (Construction) Limited

CLIENT: Cumbria Teaching Primary Care Trust

PROJECT: New Health Centre, Shap

COMPLETION: November 2009

CONTRACT: JCT Intermediate Building Contract 2005

PROJECT DESCRIPTION:

The construction of a doctor's surgery which is predominantly a single storey building with insitu concrete ground floor, strip foundations with masonry external walls. The roof area is a combination of traditional sparrred roof and 'attic' style roof trusses for occupation, with a tiled roof. Internally walls are mainly metal stud. Floors are finished with carpet and/or vinyl throughout and ceilings are suspended. Plumbing, Mechanical and Electrical systems have been installed throughout along with relevant fixtures and fittings (mainly supplied by the client).

Externally access roads, parking areas and perimeter paths are to be provided along with a surface and foul water drainage system were also included.
