

ACP (CONCRETE) LIMITED

PRESTRESSED CONCRETE WALL PANELS

- Fast Track Easy Installation
- Low Cost Walling
- Durable Low Maintenance Walling
- All Weather Construction
- No Trades - Foundation Free Walling
- High Impact Resistance - Cladding Protection
- Added Security and Fire Stop Properties
- Steel Frame Compatible Walling System
- Fast Simple and Robust Angle Bracket Connection
- Tongue and Groove Joints
- Variable Height Walling
- Simple Top Lifter Installation
- Any Length

**BRITISH
PRECAST**

THE FAST TRACK WALLING SYSTEM

For Steel Framed Buildings

- **Install 350m² of Perimeter Walling in 'One Day'**

**Ideally suited
for many Building Applications such as
Industrial, Light Industrial & Commercial,
Heavy Duty Warehousing, Bulk Storage
and Waste Transfer Stations**

THE FAST TRACK WALLING SYSTEM

ACP (Concrete) Ltd has the solution to cost effective, fast track construction of industrial and commercial walling. The ACP system eliminates the problems of skilled labour shortages for traditional construction methods (Bricklayers etc) and cuts contract time & costs associated with bricks or blocks..

ACP (Concrete) Ltd prestressed concrete wall panels are manufactured in lengths to suit your building steelwork. Units up to 8m long are available in three thicknesses,

- 95mm, - security and protection
- 145mm - fire stop & thrust walling
- 180mm - heavy duty thrust walls

Variable wall heights are achieved by interlocking standard unit heights of 500mm, 600mm, 700mm, 1000mm, 1100mm, 1200mm and 1500mm.

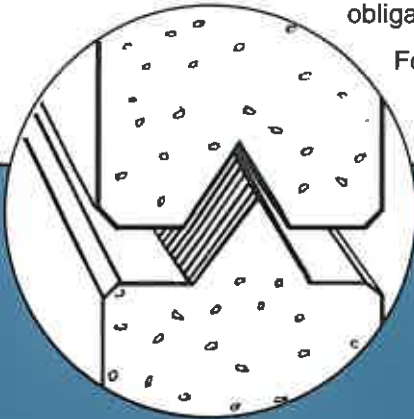

Fast Track Construction is achieved through a simple cast in lifting system on the top edge of the panel and the angle bracket connection system providing a highly durable and low maintenance wall with reduced joints, doing away with any wet trades or skilled labour requirement for installation. The

tongue/grooved joints make location of the panels simple, increasing the speed of construction.

The prestressed concrete panels provide a low cost walling system fully compatible with steel framed buildings giving the added benefits of perimeter protection to the sheet cladding, additional security to the building and excellent fire stop properties.

A full design, take off and quotation service is offered free of charge and without obligation.

For further information please contact our sales office on the number shown below or visit our website at www.acp-concrete.co.uk

DIMENSIONS

Thickness	95mm	145mm	180mm
Width (Half)	500mm*	600mm*	700mm*
(Full)	1000mm	1100mm	1200mm 1500mm
	* Not on all sizes		
Length	Any length up to approx. 8.0m		

Fast Track Construction Results in Lower Cost
