

# Thomas Armstrong (Construction) Limited

**CLIENT:** Myerscough College

**PROJECT:** New Laboratories, Bilsborrow Campus

**COMPLETION:** August 2002

**CONTRACT:** JCT Design & Build

## **PROJECT DESCRIPTION:**

Part of the continuing development of the Myerscough College Campus is the construction of this three storey laboratory facility/IT suite on a Design and Build basis. The project is of a steel frame and blockwork construction, with a pitched slate roof. Three corridors link the new building to the existing facility, two at ground floor and one at first floor level of a steel, block and glazed construction to compliment the new building.

Included in the contract are lift installation, disabled access and facilities, soft and some hard landscaping, connection to existing services, and some traffic management of routes on a busy and occupied college campus site.
